

Create an element in Javascript

```
<div id="app"></div>
```

```
const app = document.getElementById('app');
if (app) {
  // 1. Create element
  const h1 = document.createElement('h1');
  // 2. Set attributes for the new element
  h1.textContent = 'Master Yi';
  // 3. Add it to DOM tree
  app.appendChild(h1);
}
```
